

## ANCIENT TRADITIONS WORKSHOPS

This permanent workshop is intended to develop the let-go ability (trance or healing states) and the mediumship of the participants. It seeks to further abandonment in a state of high energy. This state, once reached, can be used for self-healing, orgasm development, healing others by emotional resonance, and for the incorporation of helpers of the beyond.

Jean-Michel Fitremann, Dr., psychologist and psychotherapist, who has developed the method and leads this workshop, has followed a research of more than twenty years on healing states, which took him in California, India, Morocco, Nigeria, and Brazil to work with various healers.

<b>Ancient traditions of healing and medicine</b>
